Richard Braamburg

SOLUTIONS ENGINEER | TECHNICAL ACCOUNT MANAGER

Summary

I am a bilingual (English and Dutch) Software Developer and Solutions Engineer who holds over five years of experience understanding and resolving the needs of the clients. In both creating user-centric websites and managing relationships with large clients, I love strategically communicating important takeaways to both technical and non-technical stakeholders.

Experience

SOFTWARE ENGINEERING FELLOW

General Assembly | 2019 - 2020

- Worked individually and collaboratively in all stages of development from conception and wire framing to front-end and backend execution.
- Built a Champions League platform, displaying live updates and progress metrics per team in the Champions League, and the option to track your favorite team using Vanilla JavaScript, Axios, HTML5 and CSS.
- Built a Beer and Brewery Search app, enabling the user to search beers and breweries on a variety of search criteria using React, React Router, Axios and CSS.
- Created a full stack video directory based around EDM with user authentication that provides filterable and searchable posts using Ruby on Rails with React, React Router, Axios, 3D Model-Viewer, React-player and Sass.

SENIOR KEY ACCOUNT MANAGER

DHL Express | 2016 - 2018

- Managed operations, onboarding, training and customer service for three enterprise accounts contributing over $200 million in revenue.
- Consulted on key accounts in order to develop customized product and solution offerings.
- Served as a project manager on cross-functional issues for technology, operations, and accounts teams.
- Developed and led internal classroom-style training to educate staff on ongoing issues or new product and software developments.
